Met alle wildgroei aan inspirerende zelfhulpboeken is het Jen Sincero gelukt om een verfrissend, goudeerlijk boek te schrijven waarin ze je met hilarische en inspirerende verhalen levensveranderende inzichten geeft. In hoofdstukken als 'Je brein is je bitch', 'Angst is voor losers' en 'Het was de schuld van mijn onderbewustzijn' neemt Sincero je mee op een transformerende tour. Ze laat je zien hoe je je financiën, relaties en carrière een boost geeft en eigenlijk alle geweldige dingen kunt krijgen waar je naar verlangt. Ben je bang om gezien te worden met een zelfhulpboek? Geen zorgen. Sincero was aanvankelijk ook een scepticus en heeft daarom dit boek geschreven met alleen de beste adviezen zonder een new age-sausje. Na het lezen van dit boek ben je een badass, ken je jezelf en snap je waarom je dingen doet, weet je te houden van de dingen die je niet kunt veranderen en de dingen te veranderen waar je niet van houdt, en hoe je het leven gaat krijgen waar je vroeger altijd jaloers op was.

Spacecraft takes a long look at humankind's attempts and advances in leaving Earth through incredible illustrations and authoritatively written profiles on Sputnik, the International Space Station, and beyond. In 1957, the world looked on with both uncertainty

and amazement as the Soviet Union launched Sputnik 1, the first man-made orbiter. Sputnik 1 would spend three months circling Earth every 98 minutes and covering 71 million miles in the process. The world's space programs have traveled far (literally and figuratively) since then, and the spacecraft they have developed and deployed represent almost unthinkable advances for such a relatively short period. This ambitiously illustrated aerospace history profiles and depicts spacecraft from Sputnik 1 through the International Space Station, and everything in between, including concepts that have yet to actually venture outside the Earth's atmosphere. Illustrator and aerospace professional Giuseppe De Chiara teams up with aerospace historian Michael Gorn to present a huge, profusely illustrated, and authoritatively written collection of profiles depicting and describing the design, development, and deployment of these manned and unmanned spacecraft. Satellites, capsules, spaceplanes, rockets, and space stations are illustrated in multiple-view, sometimes cross-section, and in many cases shown in archival period photography to provide further historical context. Dividing the book by era, De Chiara and Gorn feature spacecraft not only from the United States and Soviet Union/Russia, but also from the European Space Agency and China. The marvels examined in this volume include the rockets Energia, Falcon 9, and VEGA; the Hubble Space Telescope; the Cassini space probe; and the Mars rovers, Opportunity and Curiosity. Authoritatively written and profusely illustrated with more than 200 stunning artworks, *Spacecraft: 100 Iconic Rockets, Shuttles, and Satellites That Put Us in*

Space is sure to become a definitive guide to the history of manned space exploration.

Developments in Speech Synthesis

It is commonly accepted that the golden rule—most often formulated as "do unto others as you would have them do unto you"—is a unifying element between many diverse religious traditions, both Eastern and Western. Its influence also extends beyond such traditions, since many non-religious individuals hold up the golden rule as central to their lives. Yet, while it is extraordinarily important and widespread, the golden rule is often dismissed by scholars as a vague proverb that quickly leads to absurdities when one attempts to formulate it in clear terms. In this book, Harry J. Gensler defends the golden rule and addresses all of the major philosophic objections,

pointing out several common misunderstandings and misapplications. Gensler first discusses golden-rule reasoning and how to avoid the main pitfalls. He then relates the golden rule to world religions and history, and to areas like moral education, egoism, evolution, society, racism, business, and medicine. The book ends with a discussion of theoretical issues (like whether all morality reduces to the golden rule, which the author argues against). Ethics and the Golden Rule offers two introductory chapters, the first is simpler and the second more technical; a reader may start with either or both. One can then read any combination of further chapters, in any order, depending on one's interests; but Chapters 13 and 14 are technical and assume one has read Chapter 2. This is "a golden-rule book for everyone," accessible to a wide readership.
