This is the first volume to consider the popular literary category of Early Readers - books written and designed for children who are just beginning to read independently. It argues that Early Readers deserve more scholarly attention and careful thought because they are, for many younger readers, their first opportunity to engage with a work of literature on their own, to feel a sense of mastery over a text, and to experience pleasure from the act of reading independently. Using interdisciplinary approaches that draw upon and synthesize research being done in education, child psychology, sociology, cultural studies, and children's literature, the volume visits Early Readers from a variety of angles: as teaching tools; as cultural artifacts that shape cultural and individual subjectivity; as mass produced products sold to a niche market of parents, educators, and young children; and as aesthetic objects, works of literature and art with specific conventions. Examining the reasons such books are so popular with young readers, as well as the reasons that some adults challenge and censor them, the volume considers the ways Early Readers contribute to the construction of younger children as readers, thinkers, consumers, and as gendered, raced, classed subjects. It also addresses children's texts that have been translated and sold around the globe, examining them as part of an increasingly transnational children's media culture that may add to or supplant regional, ethnic, and national children's literatures and cultures. While this collection focuses mostly on books written in English and often aimed at children living in the US, it is important to acknowledge that these Early Readers are a major US cultural export, influencing the reading habits and development of children across the globe.

Critical Approaches to Food in Children's Literature is the first scholarly volume on the topic, connecting children's literature to the burgeoning discipline of food studies. Following the lead of historians like Mark Kurlansky, Jeffrey Pilcher and Massimo Montanari, who use food as a fundamental node for understanding history, the essays in this volume present food as a multivalent signifier in children's literature, and make a strong argument for its central place in literature and literary theory. Written by some of the most respected scholars in the field, the essays between these covers tackle texts from the nineteenth century (Rudyard Kipling's *Kim*) to the contemporary (Dave Pilkey's Captain Underpants series), the U.S. multicultural (Asian-American) to the international (Ireland, Brazil, Mexico). Spanning genres such as picture books, chapter books, popular media, and children's cookbooks, contributors utilize a variety of approaches, including archival research, cultural studies, formalism, gender studies, post-colonialism, post-structuralism, race studies, structuralism, and theology. Innovative and wide-ranging, *Critical Approaches to Food in Children's Literature* provides us with a critical opportunity to puzzle out the significance of food in children's literature.

How to Help Your Child Read and Write Hachette UK

In the early decades of the twenty-first century, we are grappling with the legacies of past centuries and their cascading effects upon children and all people. We realize anew how imperialism, globalization, industrialization, and revolution continue to reshape our world and that of new generations. At a volatile moment, this collection asks how twenty-first century literature and related media represent and shape the contemporary child, childhood, and youth. Because literary representations construct ideal childhoods as well as model the rights, privileges, and respect afforded to actual young people, this collection surveys examples from popular culture and from scholarly practice. Chapters investigate the human rights of children in literature and international policy; the potential subjective agency and power of the child; the role models proposed for young people; the diverse identities children embody and encounter; and the environmental well-being of future human and nonhuman generations. As a snapshot of our developing historical moment, this collection identifies emergent trends, considers theories and critiques of childhood and literature, and observes how new technologies and paradigms are destabilizing past conventions of storytelling and lived experience.

What happens when freedom of expression comes under threat? In frank and wide-ranging interviews, historian and critic Leonard S. Marcus probes the experience of thirteen leading authors of books for young people. A powerful photo essay on transgender teens is called anti-religious and anti-family. A meticulously researched primer on sex education stirs up accusations of pornography and child abuse. Picture books about two mommies (or two penguin daddies) set off a hue and cry. Two hugely popular children's series run afoul of would-be censors, one for its scatological humor, the other because it's deemed too scary. Kids' books that touch on race, sex, LGBTQ matters, the occult, "coarse language," and more have found themselves under the scrutiny of those who challenge First Amendment rights. Tune in as thirteen top children's and young adult authors speak out about what it's like to have your work banned or challenged in America today. Prompted by Leonard S. Marcus's insightful questions, they discuss why their books have faced censorship—both blatant and "soft"—how the challenges have or haven't affected their writing, and why some people feel they have the right to deny access to books. In addition, Leonard S. Marcus puts First Amendment challenges in a historical context and takes a promising look at the vibrant support network that has risen up to protect and defend young people's rights. Authors interviewed include: Matt de la Peña Robie H. Harris Susan Kuklin David Levithan Meg Medina Lesléa Newman Katherine Paterson Dav Pilkey Justin Richardson and Peter Parnell Sonya Sones R. L. Children's literature is an excellent way to educate children, on everything from social behavior and beliefs to attitudes toward education itself. A major aspect of children's literature is the importance of books and reading. Books represent adult authority. This book examines the role that books, reading and writing play in children's fantasy fiction, from books that act as artifacts of power (The Abhorsen Trilogy, The Spiderwick Chronicles, Harry Potter) to interactive books (The Neverending Story, Malice, Inkheart) to books with character-writers (Percy Jackson, Captain Underpants). The author finds that although books and reading often play a prominent role in fantasy for children, the majority of young protagonists gain self-sufficiency not by reading but specifically by moving beyond books and reading.

Summer reading loss accounts for roughly 80 percent of the rich/poor reading achievement gap. Yet far too little attention is given to this pressing problem. This timely volume now offers not only a comprehensive review of what is known about summer reading loss but also provides reliable interventions and guidance. Written by acknowledged experts and researchers on reading, remedial reading, and special education, this collection describes multiple models of innovative summer reading and

book distribution initiatives as well as research-based guidelines for planning a successful summer reading program, including tips on book selection, distribution methods, and direction for crucial follow-up. Most important, the authors clearly show how schools and communities can see greater academic gains for students from low-income families using the methods described in this book than they can from much more costly interventions.
