Algebra - Task & Drill Sheets Gr. 3-5 Carson-Dellosa Publishing

For grades 3-5, our State Standards-based combined resource meets the algebraic concepts addressed by the NCTM standards and encourages the students to review the concepts in unique ways. The task sheets introduce the mathematical concepts to the students around a central problem taken from real-life experiences, while the drill sheets provide warm-up and timed practice questions for the students to strengthen their procedural proficiency skills. Included are opportunities for problem-solving, patterning, algebraic graphing, equations and determining averages. The combined task & drill sheets offer space for reflection, and opportunity for the appropriate use of technology. Also contained are assessment and standards rubrics, review sheets, test prep, color activity posters and bonus worksheets. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy, STEM, and NCTM standards.

Offers a higher level of material that goes beyond calculation skills for children in the primary grades.

*Subtracting Fractions* [WWW.MathNotion.com](http://WWW.MathNotion.com)

Dip your toes into the world of equations with a look at elementary-level Algebra. Our resource provides task and word problems surrounding real-life scenarios. Calculate the cost of a year's membership using an equation. Do a magic trick using a calculator and math equation. Solve for "x" in an equation. Graph a solution on a number line. Find the missing number in a pattern. Explain the rule that describes a sequence of numbers. Explore expressions by substituting values with numbers. Solve problems using order of operations. Write a set of base-ten blocks as an equation. The task sheets provide a leveled approach to learning, starting with grade 3 and increasing in difficulty to grade 5. Aligned to your State Standards and meeting the concepts addressed by the NCTM standards, reproducible task sheets, drill sheets, review and answer key are included.

**Acting the New SAT Math** [www.EffortlessMath.com](http://www.EffortlessMath.com)

Learning to code is an attractive option for many parents and elementary-aged students. Most simple computer programs, however, rely on math concepts that are not yet part of a typical, elementary school curriculum. This text solves that problem by presenting math concepts selected for their importance to computer science in a way that is accessible to a younger audience through: visual models and worked examples; thoughtfully sequenced, scaffolded practice problems; written introductions, illustrations and word problems that provide real-world context; coding examples and projects written in Python; coding challenges and extensions; solutions to all practice problems,

comprehension questions and selected challenges. While many math and computer science courses equip students to complete problems by rote and copy an instructor's code, this curriculum is aimed toward facilitating the meaningful learning necessary for students to solve problems and produce original work. Note: it is recommended that students are reading at a third grade level and familiar with whole-number addition, subtraction, multiplication and division.
