A number of countries have recently discovered

and are developing oil and gas reserves. Policy makers in such countries are anxious to obtain the greatest benefits for their economies from the

extraction of these exhaustible resources by designing appropriate policies to achieve desired goals. One important theme of such policies is

the so-called local content created by the sector—the extent to which the output of the extractive industry sector generates further benefits to the economy beyond the direct contribution of its value-added, through its links to other sectors. While local content policies have the potential to stimulate broad-based economic development, their application in petroleum-rich countries has achieved mixed results. This paper describes the policies and practices meant to foster

the development of economic linkages from the petroleum sector, as adopted by a number of petroleum-producing countries both in and outside the Organisation for Economic Co-operation and Development. Examples of policy objectives, implementation tools, and reporting metrics are provided to derive lessons of wider applicability. The paper presents various conclusions for policy makers about the design of local content policies. Hamric & Hanson's

Advanced Practice Nursing - E-Book Elsevier Health Sciences
Endorsed by the Australian College of Midwives (ACM) and the New Zealand College of Midwives (NZCOM), Midwifery: Preparation for Practice has long been upheld as the definitive midwifery text for Australian and New Zealand midwifery students. [A Conceptual Approach](#)
Springer Nature

The Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition, Text Revision (DSM-5-TR), is the most comprehensive, current, and critical resource for clinical practice available

to today's mental health clinicians and researchers. DSM-5-TR includes the fully revised text and references, updated diagnostic criteria and ICD-10-CM codes since DSM-5 was published in 2013. It features a new disorder, Prolonged Grief Disorder, as well as codes for suicidal behavior available to all clinicians of any discipline without the requirement of any other diagnosis. With contributions from over 200 subject matter experts, this updated

volume boasts the most current text updates based on the scientific literature. Now in four-color and with the ability to authenticate each printed copy, DSM-5-TR provides a cohesive, updated presentation of criteria, diagnostic codes, and text. This latest volume offers a common language for clinicians involved in the diagnosis and study of mental disorders and facilitates an objective assessment of symptom presentations across a variety of clinical settings--inpatient,

outpatient, partial hospital, consultation-liaison, clinical, private practice, and primary care. Stay current with these important updates in DSM-5-TR: Fully revised text for each disorder with updated sections on associated features, prevalence, development and course, risk and prognostic factors, culture, diagnostic markers, suicide, differential diagnosis, and more. Addition of Prolonged Grief Disorder (PGD) to Section II--a new disorder for diagnosis

Over 70 modified criteria sets with helpful clarifications since publication of DSM-5 Fully updated Introduction and Use of the Manual to guide usage and provide context for important terminology Considerations of the impact of racism and discrimination on mental disorders integrated into the text New codes to flag and monitor suicidal behavior, available to all clinicians of any discipline and without the requirement of any other diagnosis Fully updated

ICD-10-CM codes implemented since 2013, including over 50 coding updates new to DSM-5-TR for substance intoxication and withdrawal and other disorders Updated and redesigned Diagnostic Classification This manual is a valuable resource for other physicians and health professionals, including psychologists, counselors, nurses, and occupational and rehabilitation therapists, as well as social workers and forensic and legal specialists. The new DSM-5-TR is the most

definitive resource for the diagnosis and classification of mental disorders.

Nomos Verlag
Edited and written by a Who's Who of internationally known advanced practice nursing experts, Hamric and Hanson's Advanced Practice Nursing: An Integrative Approach, 6th Edition helps you develop an understanding of the various advanced practice registered nursing (APRN)

roles. This bestselling textbook provides a clear, comprehensive, and contemporary introduction to advanced practice nursing today, addressing all major APRN competencies, roles, and issues. It covers topics ranging from the evolution of advanced practice nursing to evidence-based practice, leadership, ethical decision-making, and health policy. New to this edition is expanded coverage of interprofessional collaborative practice,

updated coverage of APRN roles related to implementation of healthcare reform in the U.S., updated and expanded coverage of IOM and QSEN, a global focus on international advanced practice nursing, and much more! Coverage of all APN core competencies defines and describes all competencies, including direct clinical practice, guidance and coaching, consultation, evidence-based practice, leadership, collaboration, and ethical decision-

making. Operationalizes and applies the APN core competencies to the major APN specialties including the Clinical Nurse Specialist, the Primary Care Nurse Practitioner, the Acute Care Nurse Practitioner, the Certified Nurse-Midwife, and the Certified Registered Nurse Anesthetist. Content on managing APN environments addresses such factors as business planning and reimbursement; marketing, negotiating, and contracting;

regulatory, legal, and credentialing requirements; health policy; and nursing outcomes and performance improvement research. UNIQUE! Exemplar boxes (case studies), including Day in the Life vignettes of each APN specialty, emphasize innovative practices and coverage of advanced practice roles. In-depth discussions of educational strategies for APN competency development show how nurses develop competencies as they

progress into advanced practice. NEW and UNIQUE! Expanded coverage of interprofessional collaborative practice includes the latest Interprofessional Education Collaborative (IPEC) Core Competencies for Interprofessional Collaborative Practice. NEW! Updated coverage of APRN roles related to implementation of healthcare in the U.S. reflects current and anticipated changes in APRN roles related to healthcare reform. NEW!

Coverage of IOM and QSEN has been updated and expanded. NEW! Refocused International Development of Advanced Practice Nursing chapter has been rewritten to be more global and inclusive in focus, to reflect the state of advanced practice nursing practice throughout all major regions of the world. NEW! Expanded content on the role of advanced practice nurses in teaching/education/mentoring and health policy related to the APRN role is featured in the 6th

edition.

Emphasis is placed on the analysis and interpretation of the end result of financial

reporting " financial statements.

A Translation of Sein und Zeit Harvard University Press

Our One Common Country explores the most critical meeting of the Civil War. Given short shrift or overlooked by many historians, the Hampton Roads Conference of 1865 was a crucial turning point in the War between the States. In this well written and highly documented book, James B. Conroy describes in fascinating detail what happened when leaders from both

sides came together to try to end the hostilities. The meeting was meant to end the fighting on peaceful terms. It failed, however, and the war dragged on for two more bloody, destructive months. Through meticulous research of both primary and secondary sources, Conroy tells the story of the doomed peace negotiations through the characters who lived it. With a fresh and immediate perspective, Our One Common Country offers a thrilling and eye-

opening look into the inability of our nation's leaders to find a peaceful solution. The failure of the Hamptons Roads Conference shaped the course of American history and the future of America's wars to come.

Essentials of Correctional Nursing SAGE Publications

A declassified and

sanitized document discussing the topic of lost ancient human civilizations, and cataclysms that occurred on earth thousands of years ago causing them to vanish from the earth without explanation. This peek into Chan Thomas's Adam and Eve Story that answers questions about why so much mystery surrounds our ancient past and discusses ancient enigmas like the pyramids of Giza, Easter Island, Tiahuanaco, Baalbek, and the lost city of Atlantis.

Financial Reporting & Analysis SAGE Publications

State Violence and the Execution of Law stages a provocative analysis of how the biopolitical divide between human and animal has played a fundamental role in enabling state violence, including torture, secret imprisonment and killing-at-a-distance via drones. Analyzing the complex ways in which the United States government deploys law in order to consolidate and further imperial relations of

power, Pugliese tracks the networks that enable the diffusion and normalization of the state's monopoly of violence both in the US and in an international context. He demonstrates how networks of state violence are embedded within key legal institutions, military apparatuses, civilian sites, corporations, carceral architectures, and advanced technologies. The author argues that the exercise of state violence, as unleashed by the war on terror, has

enmeshed the subjects of the Global South within institutional and discursive structures that position them as non-human animals that can be tortured, killed and disappeared with impunity. Drawing on poststructuralist, critical race and whiteness, and critical legal theories, the book is transdisciplinary in its approach and value. It will be invaluable to university students and scholars in Critical Legal and Socio-Legal Studies, Cultural Studies, Race and Ethnicity Studies,

International Politics, and Postcolonial Studies.

A Story of Faith and Conspiracy in Revolutionary America

Springer Science & Business Media

Exile was a potent form of punishment and a catalyst for change in colonial Asia between the seventeenth and early twentieth centuries. Vast networks of forced migration supplied laborers to emerging colonial settlements, while European powers banished rivals to faraway locations. Exile in Colonial

Asia explores the phenomenon of exile in ten case studies by way of three categories: “kings,” royals banished as political exiles; “convicts,” the vast majority of those whose lives are explored in this volume, sent halfway across the world with often unexpected consequences; and “commemoration,” referring to the myriad ways in which the experience and its aftermath were remembered by those exiled, relatives left behind, colonial officials,

and subsequent generations of descendants, devotees, historians, and politicians. Intended for a broad readership interested in the colonial period in Asia (South and Southeast Asia in particular), the volume encompasses a range of disciplinary perspectives: anthropology, gender studies, literature, history, and Asian, Australian, and Pacific studies. In addition to presenting fascinating, little-known, and varied case studies of exile in colonial Asia and Australia, the chapters

collectively offer a sweeping, contextualized, comparative approach that links the narratives of diverse peoples and locales. Rather than confining research to the European colonial archives, whenever possible the authors put special emphasis on the use of indigenous primary sources hitherto little explored. Exile in Colonial Asia invites imaginative methodological innovation in exploring multiple archives and expands our theoretical frontiers in thinking about the

interconnected histories of penal deportation, labor migration, political exile, colonial expansion, and individual destinies.

Introduction to Advanced Nursing Practice

Independently Published

Popular opinion suggests that information has become a distinguishing feature of the modern world. Where once economies were built on industry and conquest, we are now instead said to be part of a global information economy. In this new and thoroughly

revised edition of his popular book, author Webster brings his work up-to-date both with new theoretical work and with social and technological changes - such as the rapid growth of the internet and accelerated globalization - and reassesses the work of key theorists in light of these changes. This book is essential reading for students of contemporary social theory and anybody interested in social and technological change in the post-war era.
A Treatise on the Anti-

trust Laws of the United States National Defense University (NDU)

This new edition focuses on preparing your students to assume the role as a significant member of the health-care team and manager of care, and is designed to help your students transition to professional nursing practice.

Developed as a user-friendly text, the content and style makes it a great tool for your students in or out of the classroom. (Midwest).

An Integrative

Approach SUNY Press

Contrary to conventional wisdom, the concept of power has not always been central to international relations theory. During the 1920s and 30s, power was often ignored or vilified by international relations scholars—especially in America. Power and International Relations explores how this changed in later decades by tracing how power emerged as an important social science concept in American scholarship after World War I.

Combining intellectual history and conceptual analysis, David Baldwin examines power's increased presence in the study of international relations and looks at how the three dominant approaches of realism, neoliberalism, and constructivism treat power. The clarity and precision of thinking about power increased greatly during the last half of the twentieth century, due to efforts by political scientists, psychologists, sociologists, economists, philosophers,

mathematicians, and geographers who contributed to "social power literature." Baldwin brings the insights of this literature to bear on the three principal theoretical traditions in international relations theory. He discusses controversial issues in power analysis, and shows the relevance of older works frequently underappreciated today. Focusing on the social power perspective in international relations, this book sheds light on how power has been considered during the last

half century and how it should be approached in future research.

The Second Edition of Curriculum Theory: Conflicting Visions and Enduring Concerns by

Michael Stephen Schiro presents a clear, unbiased, and rigorous description of the major curriculum philosophies that have influenced educators and schooling over the last century. The author analyzes four educational visions—Scholar Academic, Social Efficiency, Learner Centered, and Social Reconstruction—to enable readers to reflect on their own educational beliefs and more productively interact with educators who might hold different

beliefs.

"Essentials of Correctional Nursing is the first new and comprehensive text about this growing field to be published in the last decade. Fortunately, the editors have done a great job in all respects...This book should be required reading for all medical practitioners and administrators working in jails or prisons. It certainly belongs on the shelf of

every nurse, physician, ancillary healthcare professional and corrections administrator."--Corhealth (The Newsletter of the American Correctional Health Services Association) "I highly recommend Essentials of Correctional Nursing, by Lorry Schoenly, PhD, RN, CCHP-RN and Catherine M. Knox, MN, RN, CCHP-RN, editors. This long-awaited book, dedicated to the professional specialty of correctional nursing, is not just a good read, it is one of those books that

stays on your desk and may never make it to the bookshelf."--American Jails "Correctional nursing has minimal published texts to support, educate, and provide ongoing best practices in this specialty. Schoenly and Knox have successfully met those needs with Essentials of Correctional Nursing."--Journal of Correctional Health Care Nurses have been described as the backbone of correctional health care. Yet the complex challenges of caring for this

disenfranchised population are many. Ethical dilemmas around issues of patient privacy and self-determination abound, and the ability to adhere to the central tenet of nursing, the concept of caring, is often compromised. Essentials of Correctional Nursing supports correctional nurses by providing a comprehensive body of current, evidence-based knowledge about the best practices to deliver optimal nursing care to this population. It describes how nurses can

apply their knowledge and skills to assess the full range of health conditions presented by incarcerated individuals and determine the urgency and priority of requisite care. The book describes the unique health needs and corresponding care for juveniles, women, and individuals at the end of life. Chapters are devoted to nursing care for patients with chronic disease, infectious disease, mental illness, or pain, or who are in withdrawal from drugs or alcohol. Chapters

addressing health screening, medical emergencies, sick call, and dental care describe how nurses identify, respond to, and manage these health care concerns in the correctional setting. The Essentials of Correctional Nursing was written and reviewed by experienced correctional nurses with thousands of hours of experience. American Nurses Association standards are woven throughout the text, which provide the information needed by

nurses studying for certification exams in correctional nursing. The text will also be of value to nurses working in such settings as emergency departments, specialty clinics, hospitals, psychiatric treatment units, community health clinics, substance abuse treatment programs, and long-term care settings, where they may encounter patients who are currently or have previously been incarcerated. Key Features: Addresses legal and ethical issues

surrounding correctional nursing Covers common inmate-patient health care concerns and diseases Discusses the unique health needs of juveniles, women, and individuals at the end of life Describes how nurses can safely navigate the correctional environment to create a therapeutic alliance with patients Provides information about health screening, medical emergencies, sick call, and dental care Serves as a core resource in the preparation for correctional nursing

certification exams Biopolitical Caesurae of Torture, Black Sites, Drones Liverpool University Press Principles of Agricultural Economics, now in its second edition, showcases the power of economic principles to explain and predict issues and current events in the food, agricultural, agribusiness, international trade, natural resource and other sectors. The field of agricultural economics has expanded to include a wide range of important and interesting

topics, including macroeconomics, international trade, agribusiness, environmental economics, natural resources, and international development. For this new edition, the text has been updated throughout with a new chapter on policy, separate chapters for supply and demand, and increased coverage of key topics and approaches including finance, trade and behavioural economics. Readers will also benefit from an expanded range of case

studies which demonstrate real world examples of the principles under discussion. These include obesity, alternative fuels, trade disputes, and animal welfare. The companion website provides students and instructors with extra material in order to enhance their learning and further their understanding of agricultural economics. This book introduces economic principles in a succinct and reader-friendly format, providing students and instructors

with a clear, up-to-date, and straightforward approach to learning how a market-based economy functions, and how to use simple economic principles for improved decision making. The principles are applied to timely, interesting, and important real-world issues through words, graphs, and simple algebra. This book is for students who study agricultural economics, microeconomics, rural development and environmental policy. *The Adam and Eve Story*

Routledge
Prepared under the auspices of the International Council of Nurses (ICN), this first volume provides a comprehensive overview of the rapidly emerging field of advanced nursing practice. It addresses central issues in the role and practice development that are fundamental to defining and differentiating the nature of this field. Topics include defining the role, role characteristics, scope of practice, education, regulation and research.

Obstacles to and facilitators of that role are addressed and include ethical questions arising in the context of practice development. With an

international focus, this volume examines international developments in the field, as reflected in country-specific case studies and

examples. It offers a valuable resource for advanced practice nurses, educators and administrators at healthcare institutions.
