Language Central for Math helps ELLs and struggling students develop the academic vocabulary necessary to master math. Oftentimes it's the math vocabulary, not the mathematical concepts, that hinder student mastery. Language

Central for Math is designed to directly address this issue - and to reinforce the instruction given in the math classroom. The curriculum that serves as the foundation of the program was developed by Fitchburg Public School District (MA), with a goal to provide better Mathematics access to its growing ELL population. Language Central for Math incorporates this

curriculum within an ELL instructional framework developed by Dr. Jim Cummins, Pearson Advisor and Professor at Univ of Toronto. The program was designed for easy and flexible implementation: It supplements any core math program. Each lesson can be used either: 1 class/ week (ESL class) or 15-20 minutes/day (before each math class).

Motorbooks Inventory Management Vol. 2 updates some topics in Pete Kornafel's Inventory Management and Purchasing book published in 2004. The original book is still in print,

and much of it is still "best practice" for forecasting and purchasing inventory for hard goods distributors. This Vol. 2 book includes new material on SKU level forecasting with the addition of external data, a big new section on store assortment planning, some "best practice" techniques for managing special situations such as multiple sources, hub-spoke store

networks, promotions, category management and supply chain collaboration. All the content is of my own design with what I feel is “best practice” in each of these areas. And this Vol. 2 has some observations about the future of the automotive aftermarket in the U.S. This includes the impact of the Covid-19 pandemic in the (hopefully) short term, and some longer-term factors that

will, over time, profoundly change the aftermarket. Popular Mechanics Chilton Book Company Popular Mechanics inspires, instructs and influences readers to help them master the modern world.
