If you want to learn how to shoot a basketball, you begin by carefully observing someone who knows how to shoot a basketball. If you want to be a writer, you begin by carefully observing the

work of accomplished writers. Recognizing the importance that modeling plays in the learning process, high school English teacher Kelly Gallagher shares how he gets his students to stand next to and pay close attention to model writers, and how doing so elevates his students' writing abilities. Write Like This is built around a central premise: if students are to grow as writers, they need to read good writing, they need to study good writing, and, most important, they

need to emulate good writers. In *Write Like This*, Kelly emphasizes real-world writing purposes, the kind of writing he wants his students to be doing twenty years from now. Each chapter focuses on a specific discourse: express and reflect, inform and explain, evaluate and judge, inquire and explore, analyze and interpret, and take a stand/propose a solution. In teaching these lessons, Kelly provides mentor texts (professional samples as well as models

he has written in front of his students), student writing samples, and numerous assignments and strategies proven to elevate student writing. By helping teachers bring effective modeling practices into their classrooms, *Write Like This* enables students to become better adolescent writers. More important, the practices found in this book will help our students develop the writing skills they will need to become adult writers in the real world. The Stephen King

Shirley Jackson was one of America's most prominent female writers of the 1950s. Between 1948 and 1965 she published six novels, one best-selling story collection, two popular volumes of her family chronicles and many stories, which ranged from fairly conventional tales for the

women's magazine market to the ambiguous, allusive, delicately sinister and more obviously literary stories that were closest to Jackson's heart and destined to end up in the more highbrow end of the market. Most critical discussions of Jackson tend to focus on "The Lottery" and The Haunting of Hill House. An author of such accomplishment--and one so fully engaged with the pressures and preoccupations of postwar America--merits fuller discussion. To that end, this collection of essays

widens the scope of Jackson scholarship with new writing on such works as *The Road through the Wall* and *We Have Always Lived in the Castle*, and topics ranging from Jackson's domestic fiction to ethics, cosmology, and eschatology. The book also makes newly available some of the most significant Jackson scholarship published in the last two decades. [Resources in Education](#) Longman Publishing Group
The Gothic began as a designation for barbarian

tribes, was associated with the cathedrals of the High Middle Ages, was used to describe a marginalized literature in the late eighteenth century, and continues today in a variety of forms (literature, film, graphic novel, video games, and other narrative and artistic forms). Unlike other recent books in the field that focus on certain aspects of the Gothic, this work directs researchers to seminal and significant resources on all of its aspects. Annotations will help researchers

determine what materials best suit their needs. A Research Guide to Gothic Literature in English covers Gothic cultural artifacts such as literature, film, graphic novels, and videogames. This authoritative guide equips researchers with valuable recent information about noteworthy resources that they can use to study the Gothic effectively and thoroughly.

th DEXA 2001, the 12 International Conference on Database and Expert Systems Applications was held on September 3-5, 2001, at the Technical University of Munich, Germany. The rapidly growing spectrum of database applications has led to the establishment of more specialized discussion platforms (DaWaK conference, EC Web conference, and DEXA workshop), which were all held in parallel with the DEXA conference in Munich. In your hands

are the results of much effort, beginning with the preparation of the submitted papers. The papers then passed through the reviewing process, and the accepted papers were revised to final versions by their authors and arranged with the conference program. All this culminated in the conference itself. A total of 175 papers were submitted to this conference, and I would like to thank all the authors. They are the real base of the conference. The program committee

and the supporting reviewers produced altogether 497 referee reports, on average of 2.84 reports per paper, and selected 93 papers for presentation. Comparing the weight or more precisely the number of papers devoted to particular topics at several recent DEXA conferences, an increase can be recognized in the areas of XMS databases, active databases, and multi and hypermedia efforts. The space devoted to the more classical topics such as

information retrieval, distribution and Web aspects, and transaction, indexing and query aspects has remained more or less unchanged. Some decrease is visible for object orientation.
